PROFILE

Web Developer with hands-on experience in WordPress development, SEO optimization, responsive design, and UI/UX enhancement. Skilled in Elementor, custom CSS, JavaScript, Google Search Console, and website performance optimization. Experienced in managing and maintaining marketing websites, improving search visibility, optimizing website structure and indexing, and providing independent technical support in fast-paced work environments.

WORK EXPERIENCE

WEB DEVELOPER / WORDPRESS DEVELOPER

Joyno Media Inc
2025-2026

- Served as the primary night-shift IT and web support personnel, independently handling website maintenance, technical troubleshooting, and internal support tasks
- Developed and maintained WordPress websites using Elementor, custom CSS, and JavaScript
- Built responsive landing pages and marketing-focused website sections for desktop, tablet, and mobile devices
- Performed on-page SEO optimization across website pages including focus keyphrases, meta descriptions, slugs, alt text, indexing, internal linking, and content structure improvements
- Managed Google Search Console setup, sitemap indexing, and page indexing optimization to improve website visibility on search engines
- Assisted with Google Analytics integration and website performance monitoring
- Optimized website performance through image compression, WebP conversion, caching improvements, and responsive optimization
- Implemented UI/UX enhancements including sticky headers, smooth scrolling effects, animations, and interactive page elements
- Configured SMTP/email systems and optimized form workflows for improved email deliverability
- Provided technical support for CRM systems, user accounts, network-related concerns, and workstation troubleshooting
- Collaborated with QA testers, sales teams, and internal staff to resolve website and technical issues efficiently
